GALVANIZED DIAMOND MESH/LATH

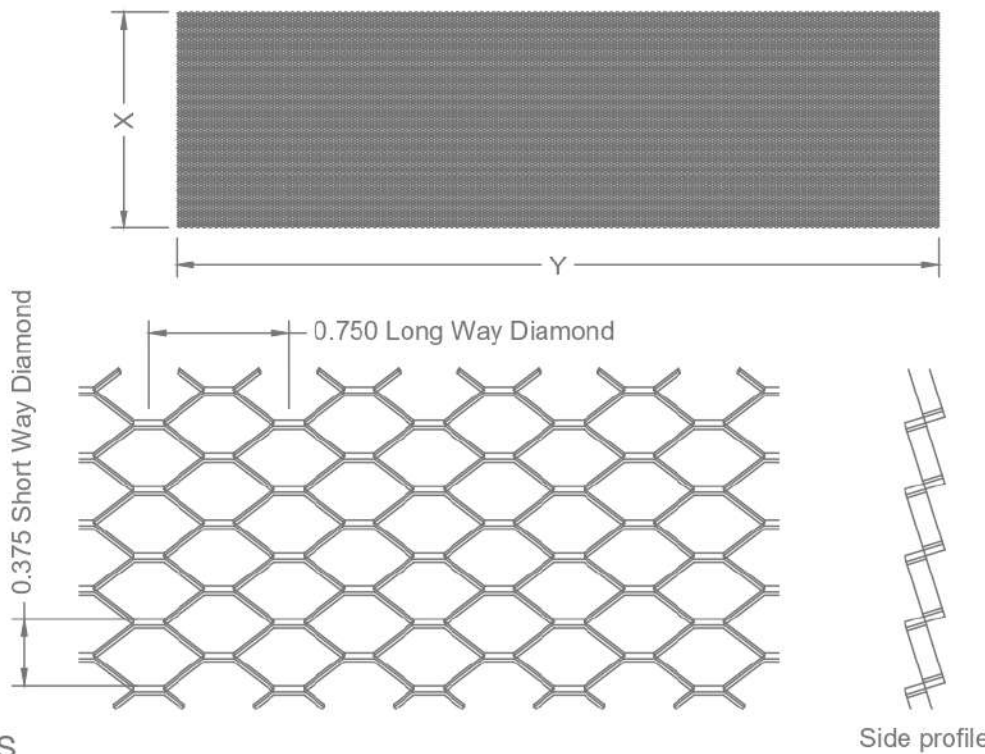

DESCRIPTION

Our Diamond Metal Lath is a reliable choice for creating strong and durable cement plaster walls. Its unique diamond-shaped keys provide excellent embedment and keying of the scratch coat, ensuring a secure and long-lasting plaster finish. This metal lath can be used with both hand and machine applied plaster, making it a versatile choice for a variety of projects. It is made from standard G60 hot-dipped galvanized steel, which provides excellent corrosion resistance. For even greater protection, we also offer G90 galvanized steel upon special request. With its reliable performance and versatile design, our Diamond Metal Lath is an excellent choice for your plastering needs.

ASTM & CODE STANDARDS

ASTM A653, C841 (installation), C847, A924, C1063 (installation), ICC ESR-1623, ANSI A42.3, ANSI A42.4, U.S. HUD 4930.1
